

# Wet FGD Upgrades

Absorber internals including MET's patented ALRD® (Absorber Liquid Redistribution Device)

**Improve SO<sub>2</sub> removal efficiency**

**Comply with new regulations set by Mercury and Air Toxic Rule**

**Improve operational stability and extend absorber life**

MET - Marsulex Environmental Technologies Corporation offers numerous options to upgrade and improve performance of existing Wet FGD units as well as state-of-the-art new and retrofit systems. Our products also include dry and semi-dry FGD systems in addition to particulate control technologies employing fabric filters and electrostatic precipitators.

Our experienced team of specialists can provide process and system analysis, engineering studies, and most importantly solutions to meet your performance objectives and the upcoming regulations.

**Solutions. Performance. Relationships.**
